Bug Report: Shady Meadows B&B

Prepared by: Haifa Samir | Environment: Production, live site https://automationintesting.online/, desktop web browser | Test date: 22 October 2026

Sources: regression suites (Booking, Contact, Admin, Navigation), user journeys (U1, U2, U3), exploratory sweep, security sweep.

Note: this is a shared demo site that other people use at the same time, and it resets bookings and messages every few minutes.

Summary

#	Title	Severity	Area
BUG-01	Guest personal data readable without sign-in	Critical	Security
BUG-02	Refused booking crashes the page and loses guest input	High	Booking
BUG-03	Reversed dates accepted, negative total shown	High	Booking
BUG-04	Room added by owner never appears to guests	High	Admin
BUG-05	Branding settings can never be saved	High	Admin
BUG-06	Past dates accepted in availability search	Medium	Booking
BUG-07	No lockout or slow-down on owner sign-in	Medium	Security
BUG-08	Double-click on Create adds the same room twice	Medium	Admin
BUG-09	Duplicate room number accepted silently	Medium	Admin
BUG-10	Double-click on Submit sends the enquiry twice	Medium	Contact
BUG-11	Contact form accepts a letters-only phone number	Medium	Contact
BUG-12	Footer Quick Links jump to top of page	Low	Navigation
BUG-13	"Amenities" menu link goes nowhere	Low	Navigation

Critical

BUG-01: Guest name, email, phone and message are readable by anyone without signing in

- **Severity:** Critical (the security sweep rated it High; it is raised because it exposes personal data and is the first reason given in the No-Go report)
- **Area:** Guest enquiries / owner Messages
- **Preconditions:** at least one guest has sent an enquiry through the contact form.
- **Steps to reproduce:**
  1. Make sure you are fully signed out.
  2. In a browser, open the address the site uses to load guest messages.
- **Expected result:** guest messages are visible only to the signed-in owner.
- **Actual result:** the full list of enquiries is shown. Each one includes the guest's full name, email, phone number and full message text. No sign-in is asked for. The owner console screen itself sends signed-out visitors to Login, but the data behind it is not protected. By contrast, guest booking data is correctly protected.
- **Impact:** personal data of every guest who sent an enquiry is exposed publicly.
- **Reproducibility:** confirmed on two separate reads, to rule out the demo reset.
- **Evidence:** security sweep, 22 Oct 2026, with screenshots.

High

BUG-02: A refused booking crashes the page and the guest loses everything they typed

- **Severity:** High
- **Area:** Room booking page (TC-018, TC-036)
- **Steps to reproduce (overlapping stay):**
  1. Book a room for a set of dates.
  2. Book the same room again for overlapping dates.
  3. Fill in valid guest details and click Reserve Now.
- **Steps to reproduce (reversed dates):**
  1. Search with Check In 28/10/2026 and Check Out 25/10/2026.
  2. Open a room, fill in valid details and click Reserve Now.

- **Expected result:** a clear message explains why the booking was refused, and the guest's details stay filled in.
- **Actual result:** the whole page is replaced by "This page couldn't load", with only Reload and Back. No reason is given and the typed details are lost. The double booking itself is correctly blocked.
- **Reproducibility:** reproduced in several runs on the same day.
- **Evidence:** two screenshots of the error page, one for each route.

BUG-03: Reversed dates are accepted and a negative total is shown

- **Severity:** High
- **Area:** Home page search to room booking page (TC-016, TC-034, TC-035)
- **Steps to reproduce:**
  1. Set Check In 28/10/2026 and Check Out 25/10/2026.
  2. Click Check Availability.
  3. Click Book now on the Double room.
- **Expected result:** a warning that check-out is before check-in, no rooms offered, and never a negative price.
- **Actual result:** all three rooms are offered with no warning. The price summary reads "£150 x -3 nights = £-450", and the Total reads "£-410".
- **Reproducibility:** seen in the Booking suite, the guest booking journey and the exploratory sweep.
- **Evidence:** a screenshot of the search with reversed dates, and a screenshot of the negative total.

BUG-04: A room added by the owner never appears on the public room list

- **Severity:** High
- **Area:** Admin, Rooms; home page, Our Rooms
- **Steps to reproduce:**
  1. Sign in as the owner.
  2. Add a new room (for example number 931, Single, £77, WiFi).
  3. Open the home page and refresh it twice.
- **Expected result:** the new room appears under Our Rooms and guests can book it.

- **Actual result:** the room is saved and listed in the owner console, but the public list still shows only the original three rooms, so guests cannot see or book it. Editing the price of an existing room works correctly.
- **Reproducibility:** seen in 3 separate runs.
- **Evidence:** a screenshot of the public list without the new room.

BUG-05: Branding settings can never be saved

- **Severity:** High
- **Area:** Admin, Branding (TC-051)
- **Steps to reproduce:**
  1. Sign in as the owner and open Branding.
  2. Click Submit without changing anything, or after editing the tagline.
- **Expected result:** the save succeeds and the change appears on the public site.
- **Actual result:** the save is refused with "Url should be a correct url format". The logo address already stored is rejected by the same form, so no change to name, tagline or contact details can ever be saved.
- **Reproducibility:** seen in the Admin suite and the exploratory sweep.
- **Evidence:** a screenshot of the refusal message after saving with no changes.

Medium

BUG-06: Past dates are accepted in the availability search

- **Severity:** Medium
- **Area:** Home page search (TC-017)
- **Steps to reproduce:** pick 10/10/2026 as Check In (the test was run on 22/10/2026) and click Check Availability.
- **Expected result:** past dates cannot be selected.
- **Actual result:** the date is accepted and rooms are offered for booking.
- **Reproducibility:** seen once.
- **Evidence:** a screenshot in the Booking suite run.

BUG-07: Owner sign-in has no lockout or slow-down after repeated wrong passwords

- **Severity:** Medium
- **Area:** Owner sign-in
- **Steps to reproduce:** enter a wrong owner password 8 times in a row.
- **Expected result:** after a few failed attempts, sign-in slows down, adds an extra check, or locks the account for a while.
- **Actual result:** every attempt is rejected instantly in the same way (about a tenth of a second each, with no growing delay). There is no lockout, no waiting period and no extra challenge.
- **Impact:** the owner account is open to automated password guessing.
- **Evidence:** security sweep, 22 Oct 2026.

BUG-08: Double-clicking Create adds the same room twice

- **Severity:** Medium
- **Area:** Admin, Rooms, Create
- **Steps to reproduce:** fill in the form (room 912, £120) and double-click Create.
- **Expected result:** one room is created.
- **Actual result:** two identical rooms are created with no warning, so guests may be shown the same room twice.
- **Reproducibility:** seen in the Admin suite and the exploratory sweep.
- **Evidence:** a screenshot showing two rooms numbered 912.

BUG-09: A duplicate room number is accepted without any warning

- **Severity:** Medium
- **Area:** Admin, Rooms, Create
- **Steps to reproduce:** create a room using a number that already exists (912), with a single normal click.
- **Expected result:** creation is refused with a message that the number is already in use.
- **Actual result:** the room is created silently, which can confuse bookings and the calendar.
- **Evidence:** a screenshot in the Admin suite run.

BUG-10: Double-clicking Submit on the contact form sends the enquiry twice

- **Severity:** Medium
- **Area:** Home page contact form (TC-042)
- **Steps to reproduce:** fill in the form and double-click Submit.
- **Expected result:** the owner receives one message.
- **Actual result:** the guest sees one thank-you, but the owner receives two identical messages, and the unread count goes up by two.
- **Reproducibility:** seen in the Contact suite, two enquiry journeys and the exploratory sweep.
- **Evidence:** a screenshot of the owner's Messages list.

BUG-11: Contact form accepts a phone number made only of letters

- **Severity:** Medium
- **Area:** Contact form (TC-043)
- **Steps to reproduce:** fill in the form, enter abcdefghijk as the phone number and click Submit.
- **Expected result:** the form refuses it with an "invalid phone number" message.
- **Actual result:** the guest is thanked, and the owner receives the message with letters in place of the phone number, so they cannot call the guest back.
- **Evidence:** a screenshot of the form accepting it, and a screenshot of the message in the owner view.

Low

BUG-12: Footer Quick Links jump to the top of the page

- **Severity:** Low
- **Area:** Home page footer, Quick Links (TC-056)
- **Steps to reproduce:** scroll to the footer and click Rooms, Booking or Contact.
- **Expected result:** each link scrolls to its section, the same way the top menu does.
- **Actual result:** every link returns the visitor to the top of the page.
- **Evidence:** a screenshot in the Navigation suite run.

BUG-13: The "Amenities" link in the top menu goes nowhere

- **Severity:** Low
- **Area:** Top navigation menu (TC-055)
- **Steps to reproduce:** click Amenities in the top menu.
- **Expected result:** the Amenities section opens.
- **Actual result:** nothing visible happens, because the site has no Amenities section.
- **Evidence:** a screenshot in the Navigation suite run.

Enhancements

#	Title	Current behaviour	Suggestion
ENH-01	Booking form error messages do not name the field (TC-002, TC-006)	Booking is correctly blocked, but messages like "must not be empty" and "size must be between 3 and 18" do not say which field is wrong	Show each message next to its field, or name the field in the message
ENH-02	"Create room" error message is too generic	With room number and price empty, the form shows only "Failed to create room"	List the missing fields
ENH-03	Booking confirmation shows dates only (TC-038)	"Booking Confirmed" with dates 2026-10-22 to 2026-10-23, and no booking reference, room name or total	Add a booking reference, the room and the total, so the guest has something to quote later
ENH-04	Booking calendar opens on the current month instead of the searched month (TC-037)	After searching for December, the calendar opens on October and the guest pages forward twice. The price is correct (£150 x 2 nights, Total £340)	Open the calendar on the month of the stay

#	Title	Current behaviour	Suggestion
ENH-05	New rooms are created without a description or photo	The Create form has no fields for them, so a new room gets a broken default photo and a placeholder description. The description box only exists on the room edit page	Add description and photo fields to the Create form
ENH-06	Standard browser security settings are missing (security, low)	The site does not tell browsers to forbid embedding it inside other sites, or to always use the secure connection	Enable these standard protections. The guest sees no visible problem today
